

Select Engagements: i|money.com

i|money.com was Canada's premier Financial Services internet portal (sold to canoe.ca mid-2000). Chaeron Corporation was responsible for the management of the complete technology team/solution, architecture, design, content, and operation of the i|money web portal.

Chaeron was responsible for:

- Content Management
- Software Development
- Architecture & Design
- Operations
- QA/Testing
- Technology Team management (recruitment, motivation & inspiration)

Chaeron delivered exemplary results:

- 6-fold portal performance improvement within two months
- Improved technology team morale with dramatically reduced friction between technology groups
- Complete site Look/Feel/Usability redesign in two months
- Improved IT procedures, operations and environment
- Improved site availability
- Complete technology re-architecture using J2EE (replacing obsolete, unmaintainable perl scripts)
- Training of complete technology team on new J2EE technologies and development
- Instrumental in sale of i|money assets, operations and smooth transition of staff to canoe.ca
- Played a key role in landing strategic, international partnership/joint venture/business sale deals
- Creation of numerous professional sales/marketing presentations/proposals supporting corporate goals

Technologies employed:

J2EE/EJB Application Server	BEA Weblogic 6.0 & Gemstone/J
Web Server / Presentation Infrastructure	Apache / Struts / Perl
JMS Messaging	BEA Weblogic 6.0
O-R Mapping (Persistence)	WebGain TOPLink
Database	Oracle 8
UML/Design	Together/J
Profiling/Optimization	Sitraka JProbe
QA/Testing	Seque and WinRunner

Chaeron management services provided:

- Complete technology team management (Content, Development & Operations)
- Business and Feature Analysis
- Delivery/Project Management/Operations of complete Portal.
- Technology team recruitment, motivation and inspiration
- BEA User Group and JavaOne Speakers on successful J2EE/EJB application implementation.
- Sales/Marketing technical support for business deals
